

Day 2

All about Clinical Trials September 2016 – London, UK

The European Society of Cardiology Working Group on Cardiovascular Pharmacotherapy is proud to be delivering an engaging and interactive 2-day course to improve the professional knowledge and skills required to plan, conduct and interpret successful clinical trials.

Our goal is for all participants to leave the meeting with the improved competence and confidence to deliver better clinical trials which in turn will have a positive impact on services and patient outcomes.

This course is aimed at improving knowledge and skills related to clinical trial planning and design as well as the successful running of different types of clinical trials. We will offer highly interactive sessions coordinated by top experts in their fields. In addition, the course will offer interactive workshops on Good Clinical Practice (GCP certificate included), regulatory issues, statistics, trial data interpretation and manuscript writing.

At the end of the course delegates will have improved their knowledge in:

- designing and planning successful clinical trials,
- evaluating and following the correct processes and regulatory procedures,
- effectively analysing and interpreting trial data.

This course will be an excellent opportunity for education, networking and creating opportunities.

Course directors:

Sven Wassmann, MD, PhD, FESC
Giuseppe MC Rosano, MD, PhD, FESC
